About Me

I am a versatile professional with expertise in both MERN stack development and textile engineering. My background in MERN stack development equips me with advanced web development skills, while my degree in textile engineering showcases my technical and problem-solving abilities. This unique combination of skills enables me to approach challenges from a multidisciplinary perspective, making me a valuable asset in the tech and textile industries.

Experience

Yunus Textile Mills YTM

Sep 2021- March 2023

- Quality controlled Through Implementation Of (MCP and processing schemes). Analytical thinking (initiated and implemented QMS system) and save 20,000metres of fabric per month.
